SECTION 1 – INTRODUCTION & BACKGROUND

1.1 Introduction

The Town of Paradise Valley (PV) issues this Request for Proposal (RFP) pertaining to solid waste, recycling, bulk waste and specialty waste collection and disposal services. The Town seeks to license a single service provider (“Provider”, “Contractor”, “Licensee,” “Proposer” or “Hauler”) for the aforementioned services to residential units in the Town of Paradise Valley. This RFP does not include services for commercial units, such as hotels, resorts, construction sites and offices.

Proposers must provide a proposal that meets all requirements of this RFP by the time and date noted on the cover.

1.2 Background

The Town of Paradise Valley lies in central Maricopa County between Phoenix and Scottsdale. Paradise Valley was incorporated as a Town on May 24, 1961. Today, the Town is still a small residential community of 16 square miles, with a 2010 Census population of 12,820 and approximately 5,750 homes. Although the Town of Paradise Valley is conveniently located between two large municipalities – the City of Scottsdale to the east and the City of Phoenix to the west – it continues to maintain its unique residential character that strictly enforces the vision described in the Town's General Plan. Residents enjoy and appreciate the peaceful and quiet surroundings, the open space, the dark nighttime sky and the unobstructed views of prominent geographical features – the Phoenix Mountain Preserve, Camelback Mountain, Mummy Mountain and the Indian Bend Wash. Paradise Valley is also home to nine world class resorts that offer numerous recreational opportunities such as golf and tennis, as well as some of the finest dining in the area.

Currently the Town of Paradise Valley licenses five solid waste Providers. Any Contractor may seek licensure by meeting the provisions of Article 8-3-2 of the Town Code. PV residents may contract with any of the five Licensees to receive service of which the frequency, scope of services and associated fee are negotiated between the customer and the contractor. As a result, many Town residents are familiar with very customized services to meet their unique residential situation. The Town does allow for home owners associations (HOA's) to contract with a single licensee for collection of those residential units.

SECTION 2 – DESCRIPTION & GOALS

The Town of Paradise Valley is requesting this proposal in an effort to achieve several goals associated with solid waste, recycling, and specialty waste collection and disposal. These include:

- 2.1 Reduction of Trash Trucks on Residential Streets** – The weight, size and frequency of trash trucks results in numerous negative impacts including wear and tear on Town

owned and private streets; daily noise issues associated with high idles and back-up alarms, and potential conflicts with pedestrian, bicyclists and smaller vehicles on tight residential streets. There are periodic conflicts as passenger vehicles become impatient and try to pass trash trucks on narrow residential streets. All of these impacts are mitigated by reducing trucks on residential streets but are individual goals as well.

- 2.2 Reduction of Collection Days – Currently Providers pick-up trash Monday through Saturday. This results in collection bins being on the street daily. Different days for different collection by different Contractors results in inefficiencies, noise and negative aesthetics for pristine neighborhoods. Further, Contractors may have significant distances between customers. Consolidation into two common days with a single hauler would address these goals.
- 2.3 Reduce Noise – Elevated idle speeds necessary to lift bins creates distinct unwanted noise. Including operation-at-idle technology has the opportunity to reduce said noise. Further, back-up alarms required for commercial vehicles are often activated when trucks negotiate PV’s narrow streets. This again creates unwanted noise. Use of “smart back-up alarm” technology that senses the ambient noise level and adjusts accordingly, can reduce noise.
- 2.4 Price Competitively – By licensing a single hauler for all residential pick-up, the Town seeks to achieve economies of scale that should significantly reduce individual prices.
- 2.5 Maintain a High Level of Customer Service – Because each collection service contract is currently negotiated individually, PV residents are able to achieve high customer service. If not, they may contract with a new provider. Town seeks to maintain this level of customer service in a Single Hauler environment.
- 2.6 Reduce Impacts on Streets – Research shows that each trip of a loaded trash truck is the equivalent of 1,000 to 1,300 light vehicles. The Town has witnessed and repaired real damage from trash trucks as they turn in cul de sacs and from operations during high temperatures. Reducing the impact of trucks is a key goal of licensing a single hauler.
- 2.7 Maximize Efficiency – With five licensed Haulers in Paradise Valley, there is great variation in the distance between customers. This leads to variable speeds between pick-ups; the purchase, maintenance and employment of drivers for multiple trucks to service the same area; and excess use of fuel and resulting emissions. A Single Licensee should provide better stewardship of precious resources for all parties.

SECTION 3 – SCOPE OF WORK
