

You are invited!

Public Meeting and Design Charrette for the Paradise Valley Visually Significant Corridors Master Plan

Town Hall

Meeting #1:

Monday, February 6th, 6:00pm to 8:00pm
Project introduction and preference surveys

Meeting #2:

Wednesday, February 8th, 6:00pm to 8:00pm
Alternatives evaluation

What are visually significant corridors?

Per the 2012 General Plan, visually significant corridors are prominent streets that demonstrate the character of the Town through attractive, experientially rewarding, and cohesive design elements. The Town will initially focus this master plan on Lincoln Drive and Tatum Boulevard.

Defining guidelines for visually significant corridors:

The project will develop consistent gateway elements and streetscape themes that reduce negative environmental and visual impacts and integrate amenities such as signage, sidewalks, street furniture, bike lanes, landscaping, and lighting that promote the character and identity of Paradise Valley.

What is a charrette?

A design charrette is a process for collaborative problem solving and decision-making during a multi-day design event that develops the community's ideas into graphic concepts and design alternatives. Community participation is requested at the Monday and Wednesday evening sessions. You may also drop by during the day on Tuesday and Wednesday.

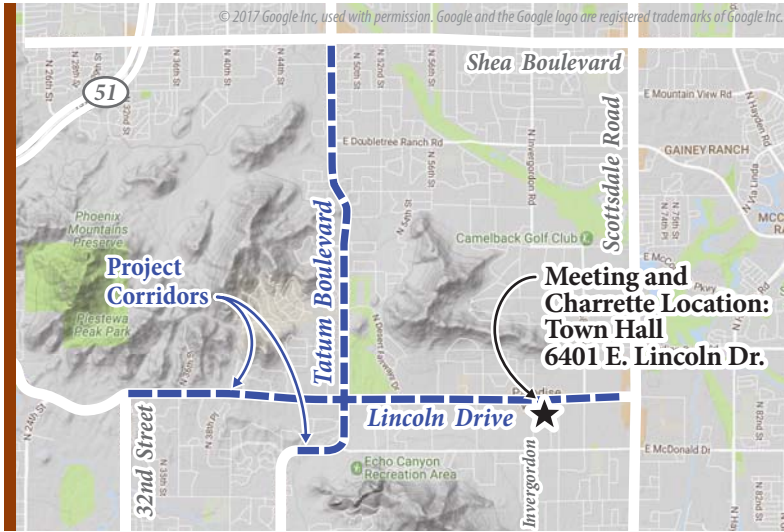

Existing Lincoln Drive
