Citizen Review Meeting Report.

We present this report summarizing the key discussions and insights shared during the Citizen Review Meeting held on November 10th. The purpose of this report is to provide a condensed overview of the information presented at the meeting. In addition, this report aims to address the questions raised by attendees. We have documented both the inquiries and the responses provided by our team.

Meeting agenda:

- Introduction: Who We Are as a Company
- Solar Energy Overview: Explanation of Solar and Its Collaboration with APS and the Church
- Project Description
- Q&A Session

1. Introduction: Who We Are as a Company

The meeting started with a warm welcome to all attendees. We took the opportunity to introduce ourselves as a company, providing an overview of Scout Solar's mission, values, and commitment to sustainable energy practices.

2. Solar Energy Overview: Explanation of Solar and Its Collaboration with APS and the Church

Following the introduction, attendees were provided with a clear understanding of the fundamentals of solar power, including its generation process, environmental benefits, and how we will work alongside with APS and the church through the projects development.

3. Project Description

To support the information shared, key facts from the Project Narrative, were presented to the attendees. These included:

- Project Overview: The project involves the installation of a 109.14 KW DC (204 solar panels, 535kw each) west-facing photovoltaic (PV) system mounted on a new carport structure situated in the parking lot of the First Southern Baptist Church. The PV system will primarily generate electricity for the church facility.
- Structural Details: PV modules mounted at a 5° tilt on a 45' x 129'-1" steel shade carport structure (5,812.40 sq.ft., 9' min height), comprised of welded structural steel with a natural rust patina.
- Environmental Considerations: No removal of existing trees, shrubs, hardscape, or plumbing is required and additional lighting will be installed in accordance with design guidelines.

- Location and Impact: The accessory structure does not modify the site's use (religious facility). Its' positioned 65'-5" from the front property line, 29'-6" from the east side, 363'-6" from the west side, and 450'-7" from the rear side, the structure has minimal impact on adjoining properties.

The citizen review meeting concluded with an open floor for questions and feedback from the 2 citizens that attended the meeting.

4. Q&A Section:

1. Question: What is the distance from the neighbors and the street?

Answer: The distance from the neighbors and the street was addressed based on the information provided during the meeting. The accessory structure is positioned 65'-5" from the front property line, 29'-6" from the east side, 363'-6" from the west side, and 450'-7" from the rear side property line. This positioning ensures minimal impact on adjoining properties and aligns with the project's design parameters.

2. Question: What kind of lights will be under the structure?

Answer: In response to this question, it was conveyed that the lighting under the structure will adhere to the guidelines set by the town. The project team is committed to following any required specifications regarding the type and design of lights, ensuring compliance with local regulations and maintaining the aesthetic considerations of Paradise Valley.

3. Question: Is there any kind of reflection from the panels themselves?

Answer: The inquiry regarding potential reflections from the solar panels was addressed by stating that, in the extensive experience of Scout Solar in similar projects, no complaints regarding reflection from the panels have ever been received. This reassurance emphasizes the consideration given to mitigating any potential concerns related to the visual impact of the proposed photovoltaic system.

Attendees were encouraged to reach out with any further inquiries or concerns.

The meeting served as a valuable platform for fostering transparency, addressing community concerns, and building a positive rapport between Scout Solar and the local community.

Most respectfully,

Armando Grijalva
