**Parcel B, Azure Luxury Homes at the Ritz Carlton Resort
SEC of Indian Bend Road and Mockingbird Lane, Paradise Valley, AZ**

Minor Amendment to SUP 01-15 (Ordinance No. 694)

Application Narrative

I. Introduction

On April 10, 2008, the Paradise Valley Town Council approved a Special Use Permit (“SUP”) to allow the development of a new Ritz-Carlton resort and associated residential properties on the approximate 105 acres generally located at the southwest corner of Indian Bend and Scottsdale Roads (Ordinance No. 603). On December 21, 2015, the Paradise Valley Town Council approved an amendment to the SUP which provided for substantial revisions to the development plan in light of significant shifts in the market and demand for certain product types, while still adhering to the same principles and sensitivity to surrounding uses as the 2008 plan (SUP 01-15 - Ordinance No. 694) (the “2015 SUP”).

The 2015 SUP provides for a Ritz Carlton Resort Hotel (Parcel A), Resort Villas (Parcel A1), Resort Related Luxury Homes (Parcel B), Resort Branded Homes (Parcel C), Resort Related Attached Residences (Parcel D), and Resort Related Retail (Parcels E1 and E2) (collectively, the “Resort”), as generally shown on the approved Land Use Plan attached at **Tab 1**. Parcel B is generally located at the southeast corner of Indian Bend Road and Mockingbird Lane in the Town of Paradise Valley, Arizona. See Aerial Map attached at **Tab 2**. A final plat for Parcel B was recorded with the Office of the Maricopa County Recorder on March 17, 2017 for a subdivision of 66 single-family lots with an average size of 13,546 square feet. See Parcel B Final Plat attached at **Tab 3**.

Shea Homes Limited Partnership (“Shea”) recently purchased Parcel B in order to develop Azure, a single-family subdivision of 66 resort-related luxury homes. Azure will offer unique luxury single-family residential homes through the use of quality materials and skillful design both on a macro and micro level. Careful attention has been made to the architectural detailing, ample open space, sensitivity to streetscape, and adherence to the overall design guidelines.

In an ongoing effort to provide a superior luxury home product both for the Resort and the Town of Paradise Valley, Shea is now seeking a minor amendment to the 2015 SUP to achieve its vision. Through this application, Shea is seeking approval from the Town for the following changes to the 2015 SUP:

- 1) Modifications to the existing 5' x 10' standard-size basement-level light wells more fully described below; and
- 2) Removal of the requirement of a "5-foot Neighborhood Walk" referenced in Exhibit G-4 of the Approved Plans.

These two amendments will help enhance the value and unique design of this luxury development, while still providing a product consistent with previous approvals and expectations.

II. Expanded Light Wells

Current Light Well Design

The 2015 International Building Code, as adopted by the Town of Paradise Valley requires that every story, basement, or portion thereof must have at least two exits (Section 427.4.2.1 - *Number of Exits*). Each of the five floorplans offered by Shea for Azure includes a basement level with multiple light wells to provide this secondary exits. See Standard Light Well Diagram attached at **Tab 4**. In the current design, the light wells are 5-foot by 10-foot in size, as permitted by Zoning Ordinance Article X. This design satisfies the Building Code while introducing an insignificant amount of light into the basement levels. It is safe to say that, at its best, this design is purely utilitarian and lacking in unique of features or qualities the remainder of this project provides and which the Town sought.

Expanded Light Well Design

After considerable discussion with its architects and additional design effort, Shea concluded that by widening, elongating and/or connecting the existing light wells, it could enhance the perceived size and value of the homes to such an extent that it could justify building an entire subdivision of 1-story homes with basements rather than introducing the additional height of full 2-story homes in a portion of Azure. The result is a Building Code requirement that now enhances the design and value of the home and, perhaps most importantly, creates a much better life safety feature (i.e. ingress / egress from the expanded light wells is far greater and easier than provided by a standard light well design).

The expanded light well design takes two forms. See Light Well Options plan and cross section exhibits at **Tab 5**.

Design 1: As seen in the exhibit, the home on the left has one contiguous light well that extends 5 feet from the house. In lieu of multiple 5' x 10' light wells along this elevation (which is permitted by the Building Code), a single, elongated light well takes its place. In this Option, the light well extends into the required 15-foot side yard setback, which is permitted by code for standard 5' x 10' light wells.

Design 2: As seen in the exhibit, the home on the right has single, contiguous light well similar to Design 1. In Design 2, however, the light well is widened, extending farther than 5 feet from the exterior wall. Design 2 will applied only to lots in which the building envelope permits a widened light well that does not encroach into the building setback.

By transforming the individual light wells into one contiguous space and positioning the light well wall farther away from the exterior wall of the basement, Shea will be able to create a unique outdoor space on the basement level that opens up the interior basement level, provides significantly more natural light for the indoor basement space, and allows for convenient ingress and egress (including life safety) from the basement level to the exterior ground level via a large sliding glass door.

Compliance with Zoning Ordinance and SUP

It should be noted, the Zoning Ordinance does not place a limitation on the depth of a light well. It only requires that any light well with a depth greater than 44-inches provide a ladder or steps. A ladder will be incorporated in the development of Design 1 and an exterior staircase will be included in Design 2.

Furthermore, Section 1001 of the Town Zoning Ordinance dictates that basement exits including window wells, stairways, and patio areas shall not be included in the height measurement if the earth has been restored so as to fully screen the portion of the basement from view at natural grade level. As illustrated in the Expanded Light Well Diagrams, Shea's proposed design complies with this requirement and, as a result, adds no additional height to the current home designs.

Lastly, should the Town choose to include the new light well exterior area in the homes square footage totals, Shea is committed to keeping the full project within the Floor Area Ratios approved in the 2015 SUP.

The Basement Level Remains Subterranean

The basement level, whether exposed by standard light wells or by the proposed expanded light wells, remains subterranean and, per Ordinance Section 1001 shall remain excluded from Floor Area Ratio calculations. A standard light well does not negate a basement's subterranean status. The inclusion of an expanded light well, even with its myriad of benefits, does not change this condition. The term "subterranean" is not defined in Article II of the Town Zoning Ordinance nor in the 2015 SUP. In fact, the only article of the Town Zoning Ordinance that defines subterranean is Article XXIII - Hillside Development Regulations:

"That space which lies totally underground, and which cannot be seen from outside the exterior perimeter of the

structure on the same horizontal plane which originates at that point where the building intersects the ground.”

This definition appears to require that, in order for a basement floor of a structure to be considered subterranean, all four walls of the floor must be fully below natural grade and in full contact with the surrounding earth. This may make sense in a Hillside context, however for several reasons, this definition does not apply to any structure outside of the Hillside Development Area. First, Section 2202 explicitly states:

“...the provisions of the Article shall apply to all land within a Hillside Development Area as denoted on FIGURE 2 – HILLSIDE DEVELOPMENT AREA and to all lands where the natural terrain under the building pad has a slope of ten percent (10%) or greater whether shown in Figure 2 or not.”

By the plain language of this section, the provisions of Article XXIII apply only to lands in the Town that fall within these requirements, and Parcel B is both on level ground and outside of the Hillside Development Area. See Hillside Development Area Map, attached at **Tab 6**.

Next, the last sentence of Section 1001 states that “[h]eight measurement as defined herein shall not be applicable in Hillside Development Areas.” This sentence confirms that the methods for measuring height and defining floors in Article XXIII are unique to Hillside Development Areas, to the exclusion of all other areas in the Town of Paradise Valley.

Finally, it is logical to interpret this definition of “subterranean” as applicable only to Hillside Development Area lands because of the unique characteristics of residential development on steep terrain. Because of the slope, floors may be partially exposed and partially in the earth. As a result, having a definition that requires a “subterranean” floor to be fully covered by dirt on all four walls would absolutely be necessary for the purposes of maximum building height, among other things. Otherwise, a property owner could theoretically build a 10-story house with 9 “subterranean” stories that are only partially inset into the hillside and call it a one-story house.

Because the definition of “subterranean” found in Article XXIII does not apply to any other article of the Zoning Ordinance, where it is found elsewhere in the code the word should be given its plain-language meaning: below the surface of the earth. A basement can be fully subterranean (completely below natural grade) without all four exterior walls of the structure completely covered by earth, as is the case here. A level that is fully below natural grade does not suddenly cease to be subterranean merely by virtue of door and staircase being installed in the exterior wall. The basement level of Shea’s home offerings in Azure, therefore, should not be counted included the FAR of the development merely because of the expanded light wells.

III. Removal of 5-foot Neighborhood Walk

Exhibit G-4 of the Approved Plans calls for a “5’ Neighborhood Walk” in Parcel B which circumnavigates the interior private drive of the subdivision. See Pedestrian Pathway System attached at **Tab 7**. It should be noted, the term “neighborhood walk” was never defined in the ordinance nor in the approved SUP. Likewise, an exhibit or section-cut detailing what a “neighborhood walk” would look like was never included in the SUP. In the pre-application meeting with Shea, Town Staff rightly pointed out that the inclusion of a 5-foot Neighborhood Walk in Parcel B was only a requirement because it was included among the Approved Plans in the 2015 SUP. The Town Ordinance does not otherwise require that residential developments in the Town include a sidewalk or walking path through the neighborhood.

In an effort to create a neighborhood environment more in line with an exclusive, luxury development, this application requests the deletion of this 5-foot neighborhood walk requirement in Parcel B of the Approved Plans. Not only will the removal of the Neighborhood Walk contribute to the charm and exclusivity of Azure, it will provide a degree of consistency with the surrounding neighborhoods of the same character. Notably, the surrounding neighborhoods of Finisterre, Cheney Estates, and the immediately adjacent Judson Estates are all devoid of sidewalks and walking paths.

IV. Conclusion

As noted above, the proposed Minor Amendment will provides an opportunity to enhance and improve upon and already remarkable development plan. The expanded light wells not only enhance the enjoyment of the basement levels with increased natural light and atmosphere, they also provide a functional, unique expansion of subterranean space that provides simpler egress/ingress from the backyard. All of these value enhancements are provided without creating additional height or altering the appearance from the outside. Additionally, the removal of the neighborhood walk will help enhance the sense of exclusivity of the Azure development by providing an experience more in line with a luxury residential neighborhood.

Approval of the requested modifications will allow Shea to offer a luxury home product in Azure that is unsurpassed in quality and unique in design, and will have no negative impact on the 2015 SUP as a whole. Rather, the implementation of the expanded light wells and removal of the Neighborhood Walk will improve the allure and exclusivity not just of the individual homes in Azure, but of the Resort as a whole. All of these elements will tie together to provide a thoughtfully designed and defined identity for the neighborhood that complements the area and creates a distinctive environment for both residents and guests.
