Town of Paradise Valley

Hillside Building Committee Combined Review Richard and Dr. Stacie Stephenson Residence August 14, 2019

Richard & Dr. Stacie Stephenson Home Proposed Color Request 5000 East Cottontail Run Road

NARRATIVE

This request is for approval of an exterior paint color on an existing home. Due to deterioration of stucco and color from weather elements over the years, the home located at 5000 East Cottontail Run Road needs fresh exterior paint for the first time since the home was originally painted in 2008. Because of the Mediterranean/Tuscan style of the home, the homeowners wish to apply a paint color within the Tuscan color palette while abiding by the Town of Paradise Valley Hillside Regulations. The new desired color is a soft Tuscan gold, has an LRV value of 26-28% (30-33% trim), will artfully blend into the landscape and the surrounding area, and will be an enhancement to Cottontail Run Road and the Town of Paradise Valley.

Section 2207.II.D of the Town's Hillside Development Regulations provide guidance relating to exterior colors:

Materials used for exterior surfaces such as structures, walls, roofs and fences shall blend with the surrounding natural setting and avoid high contrasts. There shall be no paint or material colors used which have a LRV (Light Reflecting Value) greater than thirty-eight (38) percent. Materials and color used for exterior surfaces are subject to Hillside Building Committee review and approval. The applicant must demonstrate how the materials and colors used for the exterior surfaces blend in with the natural surroundings and settings. Limited use of contrasting accent colors (in excess of 38% LRV) for small elements, including, but not limited to items such as doors and window mullions, may be allowed upon explicit approval of the Hillside Building Committee.

This section provides two criteria for colors: one objective and one subjective. The proposed color meets the objective criteria with a 26-28% LRV. The proposed color also satisfies the subjective criteria because it is consistent with other Hillside homes and does blend with the surrounding natural setting and avoids high contrast.

7620 N. Foothill Drive South [pages 6-9]

The house at 7620 N. Foothill Drive South has a similar style and uses the same color palette as that proposed for the Cottontail Run house. The painter of the Foothill Drive Tuscan style house was contacted, and he provided the precise custom color used on that residence. The attached photos of the Foothill Drive house, the rendered cover photo of the Stephenson home featuring the custom color, and excerpts from the Town file establish that the Stephenson's proposed color will blend and be consistent with the natural surroundings.

Surrounding Area [pages 10-11]

One of the criteria is that the proposed color should blend in with the natural surroundings and area. The house next door at 4820 E. Cottontail Run Road has a very similar color and the house on top of the hill has a roof that is lighter than the proposed color.

Other Homes [pages 12-17]

The photos on pages 12-17 depict the adjacent house, the Foothill Drive house, and three other homes with similar color palettes.

Zoning ordinances are to be interpreted in favor of the property owner. While it is appropriate for the Town to include aesthetic components in its Hillside Development Regulations, such standards—especially subjective standards—are to be interpreted and enforced in a way that avoids vagueness and improper delegation concerns, gives clear guidance so applicants will know in advance what will be acceptable and so that the standards can be uniformly applied to all applicants.

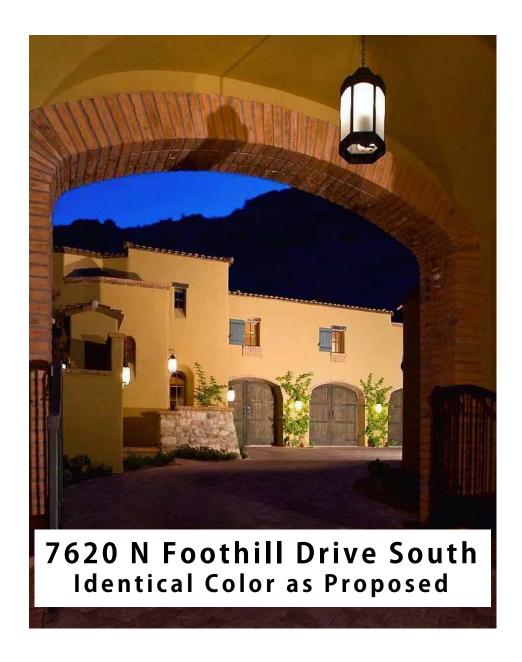

30-33 LRV (Trim)

26-28 LRV (Main House)

HILLSIDE BUILDING COMMITTEE MINUTES

September 2, 2005

On Friday, September 2, 2005, the Hillside Building Committee meeting was called to order at 8:00 a.m. Members present included Chairman Ed Winkler, Commissioner Dolf Strom, Commissioner Lou Werner, and Mayor's Designee Joan Lincoln. Staff present included Bill Mead, Town Engineer.

COMBINED REVIEW Sanctuary Resort, Gallery House Lot 3 of Sanctuary Resort

This is an applicat to construct a new swimming pool in the front the residence and remove the existing roomounted tennis court. Presenting the ar cation was Brian Crob. architect. Brian Crob explain. that the roof top tennis courts w d be removed and that some The roof area would existing walls would be lowered enclosed as a living room for gatherings. The house would be repa ed to comply th current code, and some disturbed om asked questions regarding the natural area would be put back to a natural grade grade. Joan Lincoln was concerned about the of guardrails on the slops. It was also explained that the Gallery House is owne ou made a comment that he thought it was a big improvement on the proper

There was no further discussion. There was one stipulation for apply all of the final application.

1. The Aplicant shall install handrails on the north side of the walkway to meet that requirements for safety.

Ed Winder made a motion to approve the application with the one stipulation. Dolf som sounded, and all were in favor.

CONCEPTUAL REVIEW Shacknai Residence – Lot 40 of Mummy Mountain Park Subdivision

This is an application to construct a new home on lot 40 of Mummy Mountain Park Subdivision, 7620 North Foothill Drive South. Present was the architect Dale Gardon who made the presentation. The architect explained that the existing home was demolished and removed. The new residence will be 12,000 sqft rural Mediterranean style with complimentary colors and overhangs. The home will have a pool court area and a lower level sports court that will be the same size as a tennis court. The home will have a guest arrival court, a Fire Department staging area, and an auto court area. Because of the semi-closed area in the auto court, Lou wanted to know if was included in the floor area ratio. Dolf indicated that the two enclosed courtyards should also be included in the floor area ratio. The architect assured them that he feels they are in compliance with the floor area ratio. Ed thought that the floor area ratio should be recalculated to include the auto courts and closed areas. Bill explained the area for

Hillside Building Committee Minutes September 2, 2005 Page 2

the floor area ratio. Dolf also explained the guidelines for calculating the floor area ratio. Joan had some concerns regarding the amount of lawn in the front of the house and explained that the water in the area was very sparse. Joan suggested a smaller grassy area for the final. Applicant will show landscape calculations at next review to reflect water usage with and without grassy area. Dolf was concerned about plans meeting the 20' setback and the open space criteria. It was explained that the applicant should be aware of those requirements. Ed explained the purpose of the conceptual meeting was to offer guidance and limits before the final plans were brought back to the Committee for final review. There was discussion regarding the entry gate and it was suggested that the gate not be included in the final plans.

There was no further discussion. The Committee had four stipulations for approval of application:

- Recalculate floor area ratio to include auto courts and closed areas.
- Show what water usage amounts with and without grassy area.
- 3. Review necessity for gate.

CONCEPTUAL REVIEW MDR Development, Lot 110 of Mummy Mountain Park Subdivision 6307 East Quartz Mountain Road

is to construct a new house on Lot 110 of Mummy Mountain I This applicati Ken Frank, owner was present. The previous house has een demolished. Dave Adeberry a ne design will be an be constructed on the same pad as the old home and the new house w etached structures. Ed Arizona Tuscan design, proximately 12,000 sqft under roof with n nd it was determined that it would be Previous owner, Jack asked if it was a spec home ittee on a previous application at the neighbors were opposed McDade came before the Con to. Because he was asked to make many changes to the ans, he sold the lot to Ken Frank. It was explained by the architect that evious aerials and replace the natural plans to review landscape that was in place before the d re will be no future cuts needed the mountain. Dolf mentioned that the design to maximum floor area ratio. Lou likes the ogether. Thought the applicant should bring landscape suggestion, but opposes the project forth a design that would preserve the neigh and he was concerned that he is building ght that using 24.85% of the floor area to all four setbacks and maximizing the tire lot. Th , and that it was ca er that this builder was trying to ratio did not allow for a margin of e thought that a flat land house did maximize the project. There was onversation about how Le not belong on the hillside, as oes against the purpose of the a elopment regulations. Ed building only to maximize out the los There was more discussion agreed that the applicant v d take every opportunity of the lot and not tr o maximize it for about how a builder sh ut any drainage studies that were being done on the roperty. It was profit. Dolf asked a explained that ar water coming down from the property should not end up of the neighboring lots. Dolf w concerned the 18" drainage pipe may clog. There was discussion. garding the d the fact that it was right on the property line. Ed thought it would be neficial to driveway er the driveway with significant landscaping so it doesn't appear to be on the ith a minimum of twice the distance as was presented today. Joan mentioned that ining walls were also to the maximum. There was suggestion that the new architectural
