f) **For all traffic signal installations as well as street light installations not along Scottsdale Road**, all antennas and “pole-mounted” equipment shall be within a cylinder or container (or within the replacement pole) that is within two (2) inches of the width or diameter of the **traffic signal or street light pole to which it is affixed**, with said container diameter not to exceed twenty (20) inches. The only protrusions or extensions from the **signal or street light pole** shall be those that existed before the replacement pole, that is, in the case of **traffic signals or street lights** the mast arms or other supports for **luminaires**, street name signs, and traffic signals;
