The Paradise Valley Town Council And Planning Commission Shouldn't Bail Out A Developer Who Made A Bad Deal

Government is being asked to help and bail out a lot of things these days.

But there is no more egregious example locally than in the Town of Paradise Valley.

First, we're going to let you in on a dirty little secret. Voracious developers often overpay for land because they believe one or both of the following. The market will remain robust or, no matter what they pay for the land, they can dupe, cajole and otherwise persuade local elected officials to increase the allowable development so much on the property in question that what they paid for the land becomes irrelevant.

The latter is clearly taking place with a proposal to redevelop the old Smoketree Resort in Paradise Valley. For years the family that has owned the site has maintained an exorbitant price to buy it. That's why it has fallen in and out of escrow so many times. The latest group to take a run at redevelopment is Geneva Holdings, despite having no experience in the hotel business.

Because they have, or are, overpaying for the land so substantially they are asking Paradise Valley officials to approve what would appear to be the densest project in the history of the community.

That's a big ask. Especially, when the relevancy to neighborhoods and town coffers is miniscule. Contrast this with the urgency created by a closed Mountain Shadows that threatened immediate neighbors and a beloved golf course. Or the Ritz-Carlton which will fill town coffers and

put a nail in the coffin for any future discussion about a town property tax. Or even the old La Posada which basically became a flop house at the town's most significant intersection before becoming Montelucia.

Conversely, Smoketree is largely surrounded by successful commercial properties and whatever it generates in tax revenue is largely irrelevant to the Town's budget. Whether it is redeveloped or not makes no difference to Paradise Valley's future.

But it does to the bottom line of the property owner and an inexperienced hotel developer that paid too much for the land.

This should not be the concern of Paradise Valley's politicians. Just because a developer has been trying hard for a while doesn't mean abandoning principles. Inertia is not a rationale for a wayward proposal.

The Smoketree application stands in marked contrast to its next door neighbor: The Andaz Hotel. Once the site of a struggling Cottonwoods Hotel, not unlike The Smoketree, The Andaz redeveloped as a low-scale hotel and has won travel awards across the country. Likewise, The Hermosa Inn has redeveloped similarly over the years and earlier this month was recognized by no less than Conde Nast as one of the best small hotels in America.

But because of the economics of The Smoketree deal neither the developer nor the property owner want to go down this path. This is where a necessary, steely spine of the Paradise Valley Planning Commission and Town Council needs to come in.

We just approved the densest project in the history of Paradise Valley! We bailed out a developer! We don't think that's a recipe for community acclaim.

To date, Smoketree developers have failed to communicate any rationale for their intense request. Tragically, one of the people they once hired to help them do this subsequently got kicked out of other Paradise Valley hotels for accosting African-American guests and calling them the "N" word. Nice judgment.

This is a development application worthy of ongoing attention. The next town elections are less than two years away and voters will deserve to know who contorted the community's character while also providing bank and bucket for an irresponsible developer. This is going to be a fascinating one to watch. Stay tuned.

Property along the border between PV, PHX and S/Dale really should become the subject of a tri-city development agreement. Just as the Ritz needed some mid-rise construction to make its project work right, so does the Smoketree. Unless you live in P.V. 90% of the people who go down Lincoln assume it's Scottsdale. It's run down condition fits right in with a lot of the rest of the West side of the Midtown area.

P.V. should rethink - just as Scottsdale allowed the Quarter to go high after Kierland on the Phoenix side of the line went even higher, a blanded level of elevations developed through cooperation would make both communities better places.

Consider a buffer zone for the east shores of P.V. It would make sense for P.V., for Scottsdale, and for tourists.

Smoke Tree Resort Third Neighborhood Meeting Minutes

October 21, 2020

In-Person Session – 6:00 p.m.

Virtual Session – 7:00 p.m.

In-Person Attendees below and on the attached Exhibit 1

Carol Adams

Michael Foley

Councilwoman Thomasson

In-Person Meeting Minutes

Presentation by Applicant: Paul Gilbert provided the background of the case and a high-level view of what the meeting would include. Taylor Robinson provided the context of the area and specifics of the current submittal, as well as detailed some of the compromises made as a result of Council/Planning Commission feedback:

- Eliminated for-sale units
- Reduced number of units from 180 to 122 – that's a reduction of 58 units
- We reduced the density on the south and west
- We increased the setbacks from the south property line to 60 feet, which is triple the current setback
- On the east, we increased the setback from 25 feet to 45 feet
- No third-floor rooms facing Andaz
- All third-floor rooms face Lincoln Medical Center or the center courtyard
- Only 15 keys are on the third level
- We agreed to prohibit balconies on the west and south sides to protect residential and Andaz privacy and reduce noise generating elements
- 100 feet between the residential property line and the nearest structure, which is limited to 24 feet in height
- Noise generating elements are located internal to the property and surrounded by the hotel
- Moved outdoor dining for the restaurant to the north and east away from the residential neighbors to the west
- Kept potential noise-generating elements at least 100 feet away from residential neighbors
- The pool is surrounded by rooms and the Pavilion/Event Area is buffered by landscaping and the grand entry feature
- Agreed to a maximum height of 36 feet from original natural grade.
 - We're going to lower the grade slightly in limited areas so that we can make sure the architectural elements comply with the 36-foot hard stop.
- All chimneys, towers, and other architectural features are in compliance with the requested 36-foot maximum height
- Agreed to the Town's request on access on Lincoln Drive
- We removed the entire west access driveway and now have joint access with Lincoln Medical with the ability of cross-access for each other
- Resort Communal Area –
 - Open to guests only
 - Entire area is access controlled by key card for both elevator and entry doors

- No outdoor speakers or amplified music
- No after-hours access permitted – whatever the cutoff time for “after hours” is determined to be in the Ordinance
- All exterior doors to be closed before 10 p.m. to comply with Noise Ordinance
- Open Space Criteria - Meet the OSC on the south (Andaz) and west (residential neighbors). We don’t meet the OSC on the north because of the required dedication. We don’t meet the OSC on the east (LMC), but the encroachment is miniscule

Question & Answer Session:

- Carol Adams asked questions and made comments similar to those she asked and made at the August 2020 neighborhood meeting, which she attended, related to density, traffic/parking, lot coverage and open space, and the operation of the market/coffee shop.
- Comment: This project doesn’t feel like a “resort”, it’s too much, and there does not appear to be enough space between the buildings.
 - Response: This is a process we’ve thought about a lot. This is in a redevelopment overlay that calls for allowances of increases in height and density. When you compare the five-acre cores of other resorts (which is the most dense area), our density level is right in the middle of all other resorts. Even though it feels like it’s dense, if you’re at our resort it will feel very similar to being in the middle of other resorts. Smoke Tree is the second smallest resort in the Town, the smallest SUP property, and the requested density is appropriate to create a “resort feel” and experience. This experience (density, room count, square footage) will be very comparable to Royal Palms. In addition, this Project has a significant amount of open space and public gathering areas to create an open feel and provide many places for experiential enjoyment of the property.
- Question regarding the amount of parking:
 - All three experts have agreed that the Project provides enough parking. In addition, we have provided a parking management plan to address the logistics of transitioning from regular parking to valet-only. The Project does not generate a detrimental amount of traffic. In fact, the Project is projected to generate a significantly lower number of trips than the medical center next door. For every 15 trips on our site, the medical center will have 85.
- Question: Why do you need a separate building for the market/coffee shop? Why can’t it be joined with the restaurant so you could eliminate some more space?
 - Response: If we combined, it would be the same amount of square footage. We broke it up to avoid the look and feel of massing. Allows breezeway and walking/pedestrian space. The Town didn’t want us to put up walls. They wanted us to integrate the site and make it more pedestrian and viewer friendly with a better streetscape.
- Question: Is there a 3-D tabletop model of this project?
 - Response: No, but we’re working on some renderings of the Project and hope to have those shortly.

- Neighbor Michael Foley commented positively on the Project. He thinks it looks fantastic and will be a positive addition to the town. He is in support of the Project.

In-Person Meeting Closing Remarks

Paul Gilbert wrapped up the meeting by thanking everyone for coming, that their participation was appreciated, and that if anyone has any further questions, we're happy to answer them at any time.

Zoom Attendees:

Commissioner Rose

Dawn Cartier

Jason Walton

No one from the public attended the Zoom meeting. Accordingly, the virtual session was closed at approximately 7:15 p.m.

Neighborhood Meeting

RE: SmokeTree Resort Redevelopment (Special Use Permit – Major Amendment Application SUP-18-05)

Dear Mayor, Council and Planning Commission:

We represent the Ruttle and Livi families (the “Clients”) who live in the residential neighborhood immediately west of the SmokeTree Resort located at 7101 E. Lincoln Dr. Together, our Clients own approximately 5.3 acres of property located along Quail Run Rd., and make up four of the seven homes that currently share the road on a daily basis (6428 N Quail Run Rd, 6927 E Quail Run Rd, 6921 E Quail Run Rd, and 6316 N Quail Run Rd). As residential neighbors who have been in their homes since 1976, our Clients will feel the greatest impact by the proposed SmokeTree Resort redevelopment (Special Use Permit – Major Amendment Application SUP-18-05) which is set to be the most dense development in Paradise Valley. Approving this SUP case will sandwich our Clients’ residential property between intensifying commercial uses, causing them to effectively be stranded and surrounded by incompatible development. SmokeTree made certain assurances to our Clients to address these encroachments that will severely diminish the usefulness, value and privacy of our Clients’ property due to increased commercial uses, density, traffic and height proposed by their redevelopment. We don’t see that anywhere in their proposal. If the Town of Paradise Valley (“Town”) is going to approve this SUP case, we respectfully request that two stipulations are included: (1) that SmokeTree install a private gate on the private portion of Quail Run Rd., and (2) that SmokeTree provide our Clients’ properties resort access in perpetuity.

Our Clients are concerned with the intrusions on their privacy and the devaluation of their residential property this redevelopment will cause. While our Clients are grateful for SmokeTree's willingness to mitigate these issues by verbally offering to install a private gate on the private portion of Quail Run Rd. and to provide their properties resort access in perpetuity, SmokeTree has not taken any actionable steps in furtherance of providing either. For that reason, it is necessary that these items be included as stipulations to their SUP case. As was stated at the beginning of the SmokeTree SUP, it was the least they could do for a historically residential area that is rapidly becoming more and more isolated as it is surrounded by dense redevelopment.

1. The SUP should stipulate that SmokeTree shall install a private gate on the private portion of Quail Run Rd.

The existing SmokeTree Resort has operated in harmony with the adjacent residential community for decades. This is due to its relatively low-rise construction and limited density which is consistent with the character of the Town. Additionally, guests and employees of SmokeTree entered the resort on E. Lincoln Dr., where its only two access points were located, and did not utilize Quail Run Rd. which has always been a dead end road into a residential area. Approval of the proposed SUP Major Amendment would change the nature of our Clients' neighborhood drastically as it proposes to instead make Quail Run Rd. its primary access point. What will be the most dense development ever proposed in Paradise Valley will significantly increase traffic on Quail Run Rd. (and by consequence in our Clients' neighborhood) as what has always been a residential street would be allowed to become the main access point for SmokeTree.

When the Andaz Resort was developed, the Town allowed the construction of an emergency exit road with a driveway opening to the southern private property portion of Quail Run Rd that is owned by our Clients (APN 174-63-009B). This occurred without our Clients' approval and is a liability for them. Similarly, a substantial increase in traffic on Quail Run Rd will be a liability for our Clients as SmokeTree traffic will inevitably reach the private road. To help alleviate this concern and help mitigate their privacy concerns, the owners of SmokeTree have offered to close off this private road with a private gate so that their guests, employees, delivery, and other commercial traffic don't make it to the private property. In order to ensure the installation of this private gate, we are requesting that SmokeTree begin all necessary application processes with their engineers and agree to a stipulation in the SUP case addressing its application and construction. The stipulation should provide that SmokeTree will design, apply for, and construct a private gate at the private portion of Quail Run Rd. within one year of approval of the SUP. Prior to submittal, the gate design must be pre-approved by our Clients. Our Clients are prepared to provide necessary owner authorizations for its timely approval.

2. The SUP should stipulate that SmokeTree shall provide resort access to our Clients' properties that would run with their land.

Additionally, from the beginning SmokeTree indicated that they would agree to provide our Clients with resort access that would run with their land in perpetuity. Our clients provided a proposed agreement stating as such but it was not returned. It is without question that if this application is approved and the SmokeTree Resort is redeveloped, our Clients' property values will be negatively impacted due to increased traffic and lack of privacy. Redevelopment of the SmokeTree Resort in the manner proposed will certainly make residential living on Quail Run Rd.

undesirable to future owners. As indicated by the top realtors in the Town, now that SmokeTree is no longer a high-level resort and our Clients have no privacy, the value of their property has gone down and they will need a gate, resort access, or to completely rezone. Additionally, top realtors in the Town stated that our Clients' land was the hottest area to live with everything within walking distance but that now it seems to be the least livable area due to privacy and public access. Providing resort access would help to provide an amenity for current and future owners of our Clients' properties. To ensure that such an agreement is entered, we are requesting that a stipulation is added to the SUP case addressing permanent resort access rights that will run with our Clients' land. This agreement should provide that all current and future owners and occupants of our Clients' property will have access to the resort's amenities. Our Client is prepared to work with SmokeTree to come to a fair agreement.

Conclusion

What was once the best place to have a private residence has now been changed to the least desirable place to have residential homes. Our Clients' residential homes have continuously had their privacy encroached upon by new and intensifying commercial uses for decades. Changes to the Andaz Resort parking lot have resulted in a parking lot alongside their property, and an emergency exit leading to their private road opening them up to liability and exposing them to public intrusion. The newly constructed four-way light on Lincoln and Quail Run Rd., and proposed modification to make Quail Run Rd. SmokeTree's main access road, has transformed what was once a private residential street into a major intersection. Expansion of the Applewood Pet Resort and approval of the Ritz Carlton has further engulfed our Clients in substantial density. As a result of these changes approved by the Town, our Clients' property has become totally incompatible and is stranded in the middle of the densest development in the Town. Our Clients will therefore have to consider their development options in the future.

As you know, the proposed SUP Major Amendment Application has gone through substantial revisions in the last couple of years. Including the above described stipulations in the SUP case stating that (1) installation of a private gate on the private portion of Quail Run Rd. be installed, and that (2) SmokeTree provide our Clients' properties resort access in perpetuity, as promised by SmokeTree, would help alleviate some of the issues caused by their proposal. Thank you for considering our Clients' concerns in the redevelopment of the SmokeTree Resort and how it impacts existing residential neighbors. Please let us know if we can be of any assistance as our Clients consider their position on this case.

Sincerely,

/s/ Jordan Rose and Omar Abdallah

jbienwillner@paradisevalleyaz.gov

Re: Objections to 2020 SmokeTree Resort Proposal.

Dear Mayor Bien-Willner and Paradise Valley Town Council members:

With regard to the current SmokeTree Resort proposal, we think it preferable for the Paradise Valley Planning Commission to apply the same special use permit (“SUP”) requirements to the SmokeTree Resort as were applied to Andaz Scottsdale Resort & Bungalows (“Andaz”).

The SmokeTree Resort is seeking considerable density (122 rooms) as the property is small (4.6 acres) and is bordered on three sides by commercial property.

By comparison, Andaz had requested greater density, a third story, and a condominium component. Paradise Valley’s Planning Commission would not allow Andaz to build as requested. This has resulted in the Andaz becoming an absolute sanctuary. Mr. Stougaard created a truly beautiful project. We would hope this would be special as well.

The differing access points for Andaz and the SmokeTree Resort are of note. The Andaz is accessed via Scottsdale Road, while SmokeTree is accessed via E. Lincoln Drive—the eastern most part of which is already busy due to the Lincoln Scottsdale apartments, AJ’s Fine Foods shopping center, and Fat Ox restaurant. The sometimes-congested traffic at the intersection of Scottsdale Road and E. Lincoln Drive will potentially worsen significantly and could be a thorn in the side of Paradise Valley residents should the SmokeTree Resort Proposal be permitted. The SmokeTree Resort

applicant would be wise to work towards something more in tune with The Hermosa Inn—which has an excellent restaurant and 43 guest suites and casitas; or, at least be consistent with Andaz.

The SmokeTree Resort applicant's argument that the property needs a minimum of 122 rooms (a 242% increase over the density of Andaz) to be fiscally viable needs careful review. The SmokeTree Resort has operated as a functional inn with restaurant since 1966 with only 26 total suites and bungalows and Andaz appears to be doing well in non-Covid times.

We kindly ask that you keep in mind the residents of this town who have invested in Paradise Valley because of its low density, and who will be using E. Lincoln Drive on a weekly basis. The Ritz Carlton will generate much greater traffic. Any significant increase in traffic will only result in more congestion, noise, and pollutants—none of which Paradise Valley needs.

Importantly, what is the branding? What are the actual plans?

We should have quality over quantity, recognizing that a new project should be in there for the benefit of our community.

Sincerely,

Martin R. Galbut

EXTERNAL

Hello,

Thank you for sending the information about the planning commission's meeting. I'm not sure I will be able to attend, but feel very strongly that this "resort" adds nothing to Paradise Valley.

In my opinion, their "resort" is nothing but a tarted-up Motel 6.

The density is over the top.

At the one meeting I did attend, the developer kept talking about how the restaurant, gift shop, spa will all be so small that they were really for the guests only.

What does that do to improve the Town of Paradise Valley????? All the real resorts in PV are open to the residents and offer more than just bed tax.

Do we really need more bed tax with the Ritz coming on board soon?

The land on which Smoke Tree sits is lovely with trees and open space. There must be another use for it.

Sincerely,

Jane Horn

Smoke Tree Resort Neighborhood Meeting Amended Minutes

August 20, 2020 -- 7:00 p.m.

Zoom Attendees:

Jane Horn
Patti Meade
Commissioner Covington
Commissioner Wastchak
Dawn Cartier
Commissioner Georgelos – by phone
Vice Mayor Pace

In-Person Attendees below and on the attached Exhibit 1

Jeff Miller
Rick and Carol Adams
Diane Rose
Commissioner Rose (did not sign sheet)
Roberto de la Torre

Minutes

Presentation by Applicant: Paul Gilbert provided the background of the case and a high-level view of what the meeting would include. Taylor Robinson provided the context of the area and specifics of the current submittal, as well as detailed some of the compromises made as a result of Council/Planning Commission feedback:

- Eliminated for-sale units
- Reduced number of units from 180 to 122 – that's a reduction of 58 units
- We reduced the density on the south and west
- We increased the setbacks from the south property line to 60 feet, which is triple the current setback
- On the east, we increased the setback from 25 feet to 45 feet
- No third-floor rooms facing Andaz
- All third-floor rooms face Lincoln Medical Center or the center courtyard
- Only 15 keys are on the third level
- We agreed to prohibit balconies on the west and south sides to protect residential and Andaz privacy and reduce noise generating elements
- 100 feet between the residential property line and the nearest structure, which is limited to 24 feet in height
- Noise generating elements are located internal to the property and surrounded by the hotel
- Moved outdoor dining for the restaurant to the north and east away from the residential neighbors to the west
- Kept potential noise-generating elements at least 100 feet away from residential neighbors
- The pool is surrounded by rooms and the Pavilion/Event Area is buffered by landscaping and the grand entry feature
- Agreed to a maximum height of 36 feet from original natural grade.
 - We're going to lower the grade slightly in limited areas so that we can make sure the architectural elements comply with the 36-foot hard stop.

- All chimneys, towers, and other architectural features are in compliance with the requested 36-foot maximum height.
- Agreed to the Town's request on access on Lincoln Drive
- We removed the entire west access driveway and now have joint access with Lincoln Medical with the ability of cross-access for each other
- Third Floor Amenity
 - Area A - kitchenette area to provide self-serve snacks for resort guests only; informal shared work space with seating to bring a laptop and connect to a printer.
 - Areas B and C – small seating area to relax, work on laptops, enjoy a snack.
 - Area B is enclosed – glass walls
 - Area C is open
 - Area D – restrooms (1/3 of area) and storage (2/3 of area)
 - Area E - elevator landing area for third floor
 - Areas G – fitness area (free weights, cardio, yoga); operable doors and windows
 - Entire area is access controlled by key card for both elevator and entry doors.
 - No outdoor speakers or amplified music
 - No after hours access permitted – whatever the cutoff time for “after hours” is determined to be in the Ordinance.
 - All exterior doors to be closed before 10 p.m. to comply with Noise Ordinance.
- Open Space Criteria - Meet the OSC on the south (Andaz) and west (residential neighbors). We don't meet the OSC on the north because of the required dedication. We don't meet the OSC on the east (LMC) but the encroachment is miniscule

Question & Answer Session:

- Question: Will westbound drivers be able to turn left on QRR, and will eastbound drivers be able to turn right on QRR?
 - Response: Yes, there will be a traffic light at the intersection of Lincoln and QRR with full turning movements.
- Question: What is the total coverage of all improvements on the 5-acre parcel?
 - Response: 29.3%
- Comment: This project doesn't feel like a “resort” but rather feels like a concrete jungle.
 - Response: This is a process we've thought about a lot. When you compare the five-acre cores of other resorts (which is the most dense area), our density level is right in the middle of all other resorts. Even though it feels like it's dense, if you're at our resort it will feel very similar to being in the middle of other resorts. This experience (density, room count, square footage) will be very comparable to Royal Palms. Trying to break the pieces apart and push them to the edges so they're more spread out instead of just shoved into the middle. This is in a redevelopment overlay that calls for allowances of increases in height and density.
- Question: Will there be a restaurant on site?
 - Response: Yes, and will accommodate about 85 people.
- Question: What is the operating brand/positioning of the Resort?

- Response: Boutique, independent, non-branded project. Layering of offerings in Paradise Valley, so not going to cannibalize the business of other resorts. We don't want to be just like Andaz, or Hermosa, or Sanctuary. We want to be something different. Think it's important to provide layering of offerings in the resort community. Want to offer a more approachable rate and be more interactive with other properties.
- Question: What is the targeted room rate?
 - Response: The pre-COVID annualized average daily rate Paradise Valley is \$250. In a post-COVID world, we're targeting something that's more approachable.
- Question: What is the average room size?
 - Response: We have a range of options. The average room size is 425 square feet, with 10-foot ceilings. Villa product is an average of 700 square feet.
- Comment: Mr. Coady, the owner of Applewood. Trying to buy the tear down next door so he's got 6 acres. Thinks this project looks great. It's not a concrete jungle. Looks much more like the Hermosa Inn than anything else. Really in favor of the project, right now it looks like an eyesore. Project looks absolutely beautiful. Loves the idea of the entrance on Quail Run. Really looking forward to it.
- Comment: we need to have better marketing materials.
- Question: Can we find the full application package somewhere?
 - Yes, it's on the Town website, and we're happy to provide anyone with materials if they'd like.
- Question: Where is the parking for people staying in the hotel?
 - It's effectively all the way around the site. On our original plan, it was underground. With the removal of the for-sale product at the direction of the Council, removing the underground parking was the inevitable result.
- Comment from Andaz: "First off, obviously we're supportive of another partner in our neighborhood. We would just like to see the [oleander] hedge in the back – currently it's 12-15 feet – we would love to see that maintain its height and keep that separation between the two properties." Would probably like to see it get a little fuller.
 - No problem with that. When we construct this project, we intend for the hedge to stay. If any of it is damaged, it will be replaced and supplemented so it can grow as tall as it possibly can. We're also going to be planting some sour orange hedges on the north side of the Andaz/Smoke Tree fence to provide additional screening. In addition, we'll plan live oak trees in a staggered fashion to try and screen the entire building from any views of Andaz.
- Question: Does our marketing plan call for marketing to any small or medium size conventions?

- Response: The size of the group we're capped at is a 200-person event so those are the groups we'd market to. Not going after the groups that would go to the ballrooms at Camelback Inn, that's much too big for our site.
- Question: Does the Third Floor Amenity ("TFA") look out over the residential parcels?
 - Response: The views to the south look over the pool and then over the guest rooms between it and Andaz; beyond that, likely only see sky. To the west, would look at the event lawn, then entrance, then residential parcels, and then the mountain.
- Question: So could the TFA look over backyards?
 - Response: The mature landscaping on the west side is intended to screen the views of the residential parcels on the west side. With mature landscaping it will not be visible.
- Question: Is the TFA a leisure experience or could be used for some kind of event?
 - Response: Leisure only and available only to guests. The most you could have is you and a few people who want to gather and sit someplace other than your rooms. Most hotels have a larger lobby with this kind of space in that lobby. Our lobby is very tidy and so this space is designed to provide that function and amenity.
- Question: Why do you need a separate building for the market/coffee shop? Why can't it be joined with the restaurant so you could eliminate some more space?
 - Response: If we combined, it would be the same amount of square footage. We broke it up to avoid the look and feel of massing. Allows breezeway and walking/pedestrian space. The Town didn't want us to put up walls. They wanted us to integrate the site and make it more pedestrian and viewer friendly with a better streetscape. Looks big, but actually quite small. For example, the coffee shop is 1,500 sq. ft., but only 500 sq. ft. is the actual coffee shop. The rest is receiving areas for trucks, and storage for kitchen and back of house. One of the top complaints we heard about Mountain Shadows is that one of the first things you see is the loading dock. We spent a lot of time trying to screen the unsightly elements (i.e. loading docks and BOH storage) from front visibility, unlike other resorts.
- Question: Is there a 3-D tabletop model of this project? Wished we'd been able to see something like that for Ritz and Mountain Shadows.
 - Response: No. We have a digital one, but waiting for positive recommendation from Planning Commission before advancing any additional models.
- Comment (Patti Meade): First, this is the second site plan. First one looked basic and unimaginative. This one is a lot more imaginative and creative. Likes it very much. Second, concerned about traffic because of density, Ritz, Lincoln Apartments, AJ's. Truly against 122 keys. Understands it's small and that it's surrounded on three sides by commercial, but asking the Town to allow this kind of density when Andaz was told no for third floor, condo for-sale, and more density.
 - Response: Lincoln actually operates at acceptable LOS, and the signal at QRR will really help with the flow. Reducing the number of driveways, and adding the

deceleration lanes will also help slow traffic down as they approach that intersection. Hotel won't add to the already busy traffic times because their big times are off rush hour times. Check in and check out do not coincide with rush hour. In addition, Smoke Tree has a very high walkability score, which is reflective of being next door to the Scottsdale/Lincoln corridor with all the options that that area has to offer within ¼ mile of the site. And our traffic study doesn't even take discounts for ride sharing or the walkability.

- Question: Pool/market is a good distance from other elements – how would people get snacks and drinks at the pool?
 - There will be service at the pool so you can order poolside and have it brought to you. Preparation will all be done in Area W.
- Question: So it's all room service to the pool?
 - Response: Correct
- Comment: Pool looks really little compared to the rest of the property.
 - Response: As design, pool is about 30 ft. x 60 ft. Current pool is about 1/8 that size. Pool not intended for 122 rooms and guests to come spend the whole day at the pool. Anticipate that guests will be interested in some of the on-site options, but also the other options in the area.
- Question (Patti Meade): Why do we need 122 rooms? Hermosa property is larger, but laid out beautifully. Has a spa, only 34 casitas.
 - Response: Hermosa has approximately 35 casitas, fantastic restaurant, spa, event space, but it's not a resort. It's a hotel with an excellent restaurant that hosts events. They don't have the capacity for people to stay at the resort and attend an event. We took the resort designation literally. The guest room is the primary function, everything else is accessory. When we look at that (making the rooms the primary function), we need 122 rooms to sustain operations. The Town doesn't have another category that we could shoehorn into.
- Comment (Jane Horn): This isn't a resort, it's just a hotel with a pool.
 - Response: Where would she categorize Royal Palms? Royal Palms has about 120 rooms on 6 acres so we're very similar. Agrees with Patti that it's too dense. Lovely idea.

Closing Remarks

Paul Gilbert wrapped up the meeting by thanking everyone for coming, that their participation was appreciated, and that if anyone has any further questions we're happy to answer them at any time. Vice Mayor Pace cautioned everyone to drive home carefully in light of all the storm damage that may have occurred during the neighborhood meeting.

EXTERNAL

Hello, Julie,
The meeting was interesting what I could hear of it. Our internet was very patchy and then went down during the storm.
To me, Smoke Tree Resort looks like a tarted up Motel 6. If they cannot make it following the Town's guidelines, they should not have bought the property. What gall!
Andaz (sp?) is lovely. They followed the rules.
I do not think these people should be given special privileges.
The Town made terrible decisions with Montelucia and especially with Mountain Shadows. Please don't let them make another one.
Sincerely,
Janie Horn

Dear Ms. Pace,

I am very concerned about the traffic and general congestion that this new plan for the Smoke Tree Resort will cause.

How can the developer possibly build what they are proposing on only five acres!!!!?????

With the Ritz coming and added traffic it will bring will make that intersection a nightmare.

It's already bad with the apartment complex on the north west corner.

According to the article in The Independent, the resort is and has been open and making money. I can see why the new

owners want to update, etc., but to go from under 40 units to well over 100 and then add residential. It's ridiculous and greedy.

Please consider the horrible impact this plan will have on congestion and traffic in our town.

Sincerely,

Jane Horn

Subject: FW: Smoke Tree Resort - Comments on Revised Proposed Development Plan

From: Gary Stougaard [REDACTED]

Sent: Thursday, August 13, 2020 10:54 PM

To: George Burton <gburton@paradisevalleyaz.gov>

Subject: Smoke Tree Resort - Comments on Revised Proposed Development Plan

EXTERNAL

George –

Here are my concerns about the Smoketree redevelopment project, my apologies for not getting this to you earlier today.

1. **Density:**

- Most importantly, I am concerned about density, even with the reduction in density from their original proposed development plan reflected in this new plan, the proposed density is well in excess of that allowed on the Andaz Scottsdale site. I note that they are requesting approval to construct 120 guest rooms – about 2/3 of those at the Andaz Scottsdale, on a 5 +/- acre parcel which is approximately 20% of the land area of our Resort.

In order to achieve this density, they are proposing maximum building heights of 36 feet – 12 feet higher than any structure on the Andaz site. While I appreciate that the highest point on the site is close to the center of the site, when completed, the structure will be significantly taller than anything we were allowed to construct.

In addition the proposed density will result in significantly more activity in a smaller space, likely resulting in a higher noise levels than those generated from the Andaz Resort and Bungalows

2. **Set back requirements:**

- My understanding is that the proposed setbacks for the revised project will be 60 feet. This amount is far less than the 100 foot setback required on our immediately adjacent site. Combined with the height of the proposed structures, I am concerned that this project will “loom” over the Andaz Scottsdale Resort & Bungalows and that the increased noise levels from the significantly more dense Smoketree redevelopment will negatively impact the tranquil experience currently provided to guests at the Andaz Scottsdale.

3. **Landscape barrier on the South property line of the proposed project:**

- Both of the above issues **may** be mitigated by the retention of the existing landscape barrier located on the south side of the Smoketree site. Currently, a 15 foot +/- mature oleander hedge exists on the south side of the Smoketree Resort site, which provides an effective visual and noise barrier between the Smoketree and Andaz sites. Retention of this hedge is essential to maintain the visual separation of the properties – as well as an effective noise barrier between the properties.

George, let me know if you need anything else from me relative to this issue.

Thank you,

Gary

Staff discussed your questions this morning and better understand the issue.
Your concerns will be noted in the upcoming August 18th Planning Commission meeting packet on the Smoke Tree Resort.
There will likely need to be a meeting with Smoke Tree, the Town, and your family to discuss potential solutions.

To: Town of Paradise Valley Planning Commission

Re: Smoke Tree Development Sept. 15, 2020 Public Meeting

Dear Sirs/Madam:

Please read my comments into the record.

The property tax model for the Town of Paradise Valley is toxic because it continually requires more and more commercial development to pay for the increased town services for past commercial development which, in turn, occurred to pay for services for previous commercial development (and increased density), etc.

On April 21, 2018, I explained this to then-mayor Michael Collins, "The resorts damage our peace, tranquility and beauty. They increase noise, traffic, congestion and transients. Wish I could pay my own PV share of property taxes. The property tax model is toxic."

Mayor Collins responded, "I don't disagree. However the revenue model in place is dependent on this resort industry. Changing the revenue model would take a different Council makeup."

So we can agree that the resorts damage our peace, tranquility and beauty and increase noise, traffic congestion and transients, but the "leaders" of TPV are going to do it anyway. A simple solution is to tax residents for services they receive, like every other residential community in America.

I moved to PV in 1964 and have witnessed the transformation AWAY from an extraordinary one home-one acre residential paradise. The property tax model is suicidal. We are killing the goose that laid the golden egg.

Thank you. Sincerely,

Michael L. Shoen

Subject: Smoke Tree Comment
Date: Thursday, July 2, 2020 2:53:00 PM

Ms. McCaleb:

Thank you for your interest again in the Smoke Tree Resort Special Use Permit Major Amendment application request. As noted previously, your email comment from June 26th was in the July 7th Planning Commission packet.

The Planning Commission may wish to address your question separately, but I did want to respond from a Town staff perspective.

The short answer to your question is that there are several factors that the Town looks at in determining whether to approve an application request. There is no precedent set with the approval of a different amendment application on a current request. Although, comparisons to past approvals for information do come up in the review process. Some of these factors the Town looks at include [Article XI](#) of the Zoning Ordinance that provide general purpose, intent, and allowed uses. Being a rezoning matter, the goals and policies of the [Town's General Plan](#) comes into play as well. Another important document is the [Special Use Permit Guidelines](#). As you may be aware, the proposed density does exceed the Special Use Permit guidelines. Each member of the Planning Commission for their recommendation and each member of Town Council for their action will weigh all these factors as they review the material provided, get input from the applicant, and get comments from residents like yourself.

Dear Commissioners:

I read with great interest and no small amount of concern the article on page one of the Independent newspaper of June 24th regarding the Smoke Tree Resort. I am happy to see Mayor Bien-Willner feels the town council and planning committee need to have the public weigh in on this matter. I was also gratified to see that Ms. Thomasson had genuine concern over the latest proposal from Smoke Tree which did not significantly reduce density.

Over 16 months ago the new owners of the resort brought to the planning committee and the town council a proposal that was outlandish in it's request for building height, condo element, and overall density. Mr. Stougaard, owner of the Andaaz Resort, rightfully addressed the inequity of allowing such concentration of hotel keys when he himself was made to abide within the town's density requirements.

My research shows the following:

Andaaz Resort

185 rooms on 26 acres 7.1 rooms per acre

Smoke Tree Resort (current)

26 suites on 5 acres 5.2 rooms per acre

Newest Smoke Tree Resort proposal

122 rooms on 5 acres 24.4 rooms per acre

I would like to see some clarification as to why the TPV would even consider a proposal that on a side by side comparison with Andaaz Resort, is requesting an increase in density of over 242.%. Again, that is an increase of 242% over what the TPV allowed Andaaz to build.

Factoring in the Lincoln apartments and Ritz Carlton, the increase in traffic (as well as noise, pollution, and increased congestion), I fail to see why Smoke Tree Resort should not adhere to the same density rules that applied to Andaaz.

I thank you for your hard work and attention to detail and would enjoy any feedback you might give.

Respectfully,

Patti McCaleb
