### AGENDA TITLE:

**Discussion of Camelback Lands 6 Lot Split (LS-19-05)**  
**5307 North Invergordon Road (APN: 173-20-026)**

### Request:

The applicant, Joel Saper, is requesting approval of a lot split to divide a 2.24-acre parcel into two lots. Lot 1 is 48,837 square feet in size (1.12 acres) and Lot 2 is 48,820 square feet in size (1.12 acres). The subject property is located at 5307 N. Invergordon Road.

### Existing Site:

The property has a house, guest house, pool, fences, entry gate, and tennis court located on it. The existing structures must be demolished prior to recordation of an approved plat, since the lot split cannot create any non-conforming structures.

### General Plan:

The subject property is shown as Low Density Residential (0-1 house per acre) on the Town's General Plan Land Use Map. The proposed lots are zoned R-43 and are limited to one house per acre.

### **ENFORCEMENT:**

There are no current zoning violations associated with the subject property.

### **FACTS/DISCUSSION:**

Invergordon Road: No right-of-way (ROW) dedication is required. The right-of-way is 66' wide and the Town standards require a minimum ROW width of 66' per the General Plan (for Minor Arterial Streets without a Median). Invergordon Road has approximately 43' of pavement with a 6" vertical curb adjoining the property.

#### Traffic:

Per the Town Engineer, a traffic study is not required.

#### Lot Configuration:

The proposed lot split meets all area requirements for R-43 lots, including size, lot width, access to a public street, and setbacks. Although the lot split meets the standards for R-43 properties, they may be out of character for the neighborhood as the majority of the lots in this subdivision appear to be 2.25 acres in size.

#### Utilities:

Each of the proposed lots will have the required 6 or 8-foot public utility easement along the perimeter of the lot in accordance with Section 6-3-3 of the Town Code. The following utilities will be available to each lot.

- 1) Electric: The subject site is located within the APS service area.
- 2) Water: Water for the Camelback Lands 6 Lot Split will be provided by EPCOR Water Company.
- 3) Sewer: The two new lots may be serviced by the Town of Paradise Valley sewer.

#### Drainage:

Each lot will require an individual engineering site/grading and drainage plan with each building permit application submittal. On-lot retention will be required with the development of each lot.

Based upon the topography of the property, drainage easements will be dedicated on each lot. Staff also has concern regarding the drainage report statement of, "the current channel south of lot 81 and outlet at the northwest corner of adjacent lot 79 are under-sized for current design flows.....". The Town Engineer would like to discuss this issue with the Planning Commission.

#### Fire Protection Issues:

The 2 proposed lots will meet all standards related to fire protection as follows:

- 1) Fire Department access: Both lots will have direct access onto a public roadway.
- 2) Fire hydrant spacing/location: The nearest fire hydrant is located 27 feet away from the south property line. The Town Code requires a fire hydrant to be located within 400' of a property line. An additional fire hydrant will not be required since the existing hydrant falls within the 400' limit.
- 3) Fire sprinkler requirement: The new homes and structures that will be constructed on the new

lots will have fire sprinklers in accordance with the Town Fire Code.

- 4) Fire Flow: The fire flow rate is compliant with the Town's standards. The fire flow rate for this area is 3,398 gallons per minute (gpm) and the Town Code requires a minimum flow test rate of 1,500 gallons per minute (gpm).

#### Next Steps

This application is scheduled for public meeting review on June 4, 2019 and neighborhood notification was performed in accordance with the Town's lot split process.

The applicant also provided a copy of the title report, which references restrictions placed on the Camelback Lands subdivision in July of 1945. However, it does not identify any restrictions prohibiting lot splits in the subdivision. The Town does not enforce private deed restrictions, only Town Code standards.

#### Lot Split Procedure

Per Section 6-9-7 of the Town Code, if the lot split is approved by a unanimous vote of the Planning Commission, then it shall be deemed approved. If the lot split application is not approved by a unanimous vote of the Planning Commission, then the lot split application shall be forwarded to the Council for review and final approval.
